

## Military / Aerospace

For over 40 years PPI-Time Zero has provided a suite of value added EMS services from design through system level integration including end of life services for the aerospace, military and its sub-tier market applications which include but are not limited to commercial space satellite, flight instrumentation, radar, tactical communications, autonomous robotics, power distribution, fixed /mobile ground communications for the defense and civilian communities. Our team provides high level proficiency and experience, innovative and unique capabilities, and hands-on experience to support the most complex mil/aero applications. We provide a wide variety of engineering and technical services to the federal government, prime contractor customers and OEM commercial customers with highly skilled subject matter experts.

## Medical

PPI-Time Zero offers fully integrated Class I, Class II, and Class III medical device manufacturing capabilities. From design and development, through the validation and production process, up to assembly, packaging and logistics, PPI-Time Zero brings OEM medical technology to life. PPI-Time Zero is an ISO 13485:2012 certified medical device manufacturer with a focus on delivering products to market with rigorous quality control and full regulatory compliance. We are also compliant with FDA's Quality System Regulations (QSR). PPI-Time Zero collaborates with innovative companies seeking a conscientious, cost-effective, domestic medical device manufacturing and fulfillment resource to assist them with volume turnkey contract manufacturing.

---

## Space

PPI-Time Zero offers a customized approach to space manufacturing. We provide high-level engineering development and manufacturing capabilities ranging from satellite test equipment, high density power supplies, ground station development and high frequency products for space applications. Our environmentally controlled manufacturing and test area provides special processes for customers requiring complex, high-reliability products that will operate efficiently and dependably in extreme environments. Each electronics solution is tailored to the specific needs of the customer, utilizing our extensive market experience and quality management systems that consistently deliver on requirements for performance, cost and versatility. For defense and commercial space-based applications, PPI-Time Zero is committed to providing premier solutions as your trusted manufacturing partner for mission critical, high-reliability products.

---

## Industrial Controls And Instrumentation

PPI-Time Zero helps leading companies in the industrial controls and instrumentation sector transform market challenges into customer solutions. For decades, we have developed strong partnerships with its customers to better understand their requirements while providing solutions that help them reduce complexity, cost and risks. PPI's years of experience across diverse platforms and multiple industries enables us to leverage our best in class manufacturing practices to drive value for your business. We recognize that companies in the industrial market segment are looking for more than just assembly service. PPI helps its customers move with confidence and agility even in uncertain or unfamiliar environments, with our investments in technology, supply chain management, subject-matter expertise and industry experience. With a diverse portfolio of vertically integrated capabilities and value-added engineering services, PPI provides solutions to its customers' manufacturing challenges.
