

PPI-Time Zero provides full service custom precision machining services of the highest quality at exacting standards. We have the expertise to meet stringent specifications and tight tolerances for a variety of market applications. We support rapid prototype work, high mix/low volume and volume production runs, utilizing a wide variety of materials. Moreover, we consistently provide our customers with outstanding service, quality products, on time and in a cost effective manner.

**Capabilities:** Common Materials used:

- ▶ Aluminum – All grades
- ▶ Stainless Steel – 300 series, 400 series
- ▶ Aircraft Alloys 13-8, 15-5, 17-4
- ▶ Carbon Steels
- ▶ Alloy Steels
- ▶ Red Metals
- ▶ Plastics

## Turning (Lathe) Capabilities:

- ▶ From .125 Diameter up to 8" Diameter
- ▶ Able to hold tolerances within .0002

## Milling Capabilities:

- ▶ Largest table 24" X 48"
- ▶ Can machine thicknesses from .0625 to 12"
- ▶ Compliments, 4 indexing heads and a 12" X 24" Vacuum Chuck
- ▶ Bore to .0001 round with .001 TIR
- ▶ I. D. Honing
- ▶ Assembly including heli-coil installation

## Quality & Regulatory:

- ▶ AS9100:2009 Certified
- ▶ ISO 9001:2008 Certified
- ▶ ITAR Registered
